## A lot child products crash I.E , works fine on FF.

Posted by sunny - 2008/09/28 00:54

---

Hallo.

I have 2 products one with 2 childs and the other with 24 , the first shows fine on I.E and FF , but the second with 24 childs not show on I.E , works fine in FF.

Meaning I.E 6 and 7.

I want to pass accessories for my eshop so this is kind important for me!

Any help please .

Thanks

Not relevant to these forums!

You are running J! 1.5 and VM 1.1 or higher.

These problems are handles by the VirtueMart Forums not here.

Sorry

My code uses no JS!

Your store is falling over at the submit stage of the order process, this is handled by a piece of code that I have not written.

And as the forum and the front page of this site states, I do not support VM1.1!

Sorry, but I have not worked on VM1.1 for nearly a year. As the code works OK in FF, it is a JS problem with IE and as I keep stating, this is a piece of code that I have no control over. Please post the problem on the VM forums.

Yes some problem with JS indeed but I cant debug.

Ok macalf I respect your opinion!

---

I have to say for another time that Vm users miss you a lot!!  
You were so good in supporting, I dont know what happens and you are not participate now in Vm and I cant ask this as  
it is a personal issue but I really think that your help it was so precious!!

Thanks alot macalf!  
I hope one day to join your knowledge again with Vm !
